

Generate a webgl 3d morphing blobby organic shape, constantly undergoing internal and external interactions, from time series user input from mouse, touch, writings, network, meta data, sensors access. The blob use vivid color gradients blending organically around the plasmid membrane holding color energy burst and function wave. Smooth interaction and add full UI controls collapsable. Generate the complete webgl shader simulation based on json schema input and live metrics from config and directives as actions retrieving state, computing awareness. The blob parse stochastically into smaller bubble which display a label, metrics, water rippling polar waves. The blob is a digital life name Unsigned Zeta overflow

Financial system disruption

Escrow in capitalism is a conflict at a fundamental level from the magnitude of abstraction

The mediums of financial systems require money to move | Exchange

Tho

The medium to store value is still

—> Antagonist acting as forces

Truce between movement and stasis

Subversive
